

MIMOS STRATEGIC DIRECTION

2026 – 2030 • Briefing to Secretary General MOSTI

MANDATES

1

1 January 1985 – Original Charter

- The Government of Malaysia established the Malaysian Institute of Microelectronic Systems in 1985 for the purpose of initiating and undertaking research and development activities in microelectronics and information communication technology **to develop and enhance the local electronics industry's innovation and competitiveness.**

2

28 September 2005 – Cabinet Mandates

- After a decade of MIMOS being corporatised (1995 – 2005) and to ensure that MIMOS continues to remain focused on its role as an R&D institution, on 28 September 2005, the Cabinet agreed to give the following mandate to MIMOS:
 - MIMOS is maintained as an R&D entity with a focus on the field of ICT, semiconductors and microelectronics in addition to **playing an active role in creating new technology companies (new technology ventures)**; and
 - MIMOS **creates a market-oriented Technology Venture Incubation division or company.**

3

29 August 2018 – Cabinet Meeting

- The need to improve and empower MIMOS as the main research centre in the field of technology in this country:
 - Research and development of microchip processing and microelectronics;
 - In addition to the field of ICT, venture into research in nanotechnology, especially nanoelectronics;
 - The commitment and need to establish or separate the commercialisation branch from the R&D branch to ensure that the branch has a clear mandate in optimising MIMOS's income;**
 - MIMOS has a role to strengthen the commercialisation branch and encourage certain parties to commercialise products and services that have been produced by the local industry.**
 - The focus of MIMOS research needs to be set based on real expertise as well as in specific niches such as Blockchain.

KEY MESSAGES

MIMOS to develop and enhance the local electronics industry (**value-add local companies**).

MIMOS to play an active role in creating new technology companies and market-oriented technology ventures (**JVcos, spin-offs and/or techno ventures**).

MIMOS to establish a separate commercialisation branch (**establish MIMOS Techno-Venture**) with a clear mandate in optimising MIMOS's income and to strengthen the branch and encourage certain parties (i.e. **by working closely with strategic partners**) to commercialise products and services that have been produced by the local industry.

KEY DECISIONS SOUGHT

Key Decisions Sought from KSU (MOSTI)

- 1 Endorse MIMOS as the national applied R&D institution to develop sovereign government digital services.
- 2 Endorse the strengthening of the Semiconductor Technology Centre (STC) as a strategic national asset to support the National Semiconductor Strategy (NSS), talent development, R&D, prototyping, advanced packaging, and industry collaboration.
- 3 Support the continued implementation of the Government-approved RMK13 programmes on Deepfake Detection and Blockchain throughout the planned five-year implementation period.
- 4 Provide a dedicated funding pathway under SRF/PEMACU 2.0 for MIMOS to undertake strategic national technology projects in line with its Government mandate.
- 5 Provide funding commensurate with MIMOS' mandate as Malaysia's national semiconductor R&D leader to strengthen strategic technology capabilities and national competitiveness.
- 6 Establish a dedicated funding mechanism for the strategic management and maintenance of MIMOS' intellectual property portfolio to safeguard Government-funded technologies, strengthen technology sovereignty, and maximise long-term commercial and national value.
- 7 Facilitate introductions to the appropriate State Government focal points to enable MIMOS to advance the technology solutions presented during the MEXCO-STI engagements in May 2026 towards pilot implementation and adoption.
